

AMPHIBIOUS

BENEFITS

- Only vehicle capable of floating in 1.5m of water
- Traverses soft sensitive soils and operates in up to 20m of water (sheltered)
- Ideal for environmentally sensitive wetland, lake and protected water habitats
- Small footprint ensures lowest possible environmental/animal impact
- Tools and technology developed in-house to effectively work together (CPT, Seismic, sampling)

SPECIFICATIONS

- All steel cargo carrier buggy
- Operates from dry-land to 20m of water and floats in 1.5m water depth
- Can be equipped with small drill rig or Geoprobe rig for sampling & CPT
- Speed of 5 km/hr on-land
- Swimming speed (0.8km/hr) can be increased dramatically if towed or used with added propeller.
- Accommodates up to 8 people
- Can be disassembled for flexible transport
- Weight: 9525kg (21,000lbs)
- Payload capacity: 5443kg (12,000lbs)
- Total dimensions: 2.9m high, 4.26m wide, 8.8m long
- Deck dimensions: 7.9m long x 4.26m wide
