

SEABED CPT

BENEFITS

- Proprietary coiled rod handling for continuous push to 45m
- Custom heavy-duty rods for deep penetration and high thrust
- 14-20T weight in air with ballast for up to 200kN reaction force
- Full-size 10cm² cone
- A.P. van den Berg CPT communication system and tooling
- Experienced team of operators for effective and high quality data collection
- Tools and technology developed in-house to effectively work together

SPECIFICATIONS

- A-frame or crane deployment
- Rated up to 4000msw
- 10cm² cone w/optional seismic module
- 45m depth capability below seafloor
- 14-20T weight in air with modular configuration
- Up to 200kN push capacity
- Dimensions: 5m high, 2.5m x 2.5m base
